

Trusted Experts:

Healing Pathology Billing Limitations With A Lasting Cure

How Coronis Health transformed a pathology practice's legacy billing into a data-rich, future-ready platform in just 90 days.

Client: Pathology Associates of North Texas

Specialty: Anatomic and clinical pathology

Location: Wichita Falls, Texas

Scale: 14 staff members

The challenge:

Cure an outdated billing process

Pathology Associates of North Texas (PNT) had its eye on the future, but its billing operation was firmly in the past. Decades-old software and a team nearing retirement offered only limited reporting, while manual workflows slowed cash flow, provided limited reporting and hid under-payments. To move from a traditional setup to a dynamic, sustainable platform with richer analytics, PNT called upon Coronis Health to operate as an extension of its in-house team.

"What really impressed us was Coronis Health's pathology-specific expertise—it was critical to our success."

PNT Leadership

Results within 90 days¹:

Up to 50% faster
billing turnaround

Early revenue growth, with
more on the horizon

Improved payer compliance
through active oversight

Real-time data driving
smarter decisions

Solution offered:

Full-service pathology
revenue cycle management

The Coronis Health approach: Data-driven, future-ready remedy

Alleviating mounting pressures on PNT's billing team was paramount. To facilitate a smooth and highly collaborative transition, Coronis Health formed a cross-functional task force, tapped the expertise of every PNT department and empowered staff as full partners. In just 90 days, the joint team migrated to a new billing platform that delivered reporting and analytics PNT had never had. Not only were they seeing the results today, but they were pointed in a clear direction for future billing and reporting demands.

Seeing every service line on one dashboard turned PNT's data into revenue.

Coronis Health implemented current procedural terminology billing with partnering hospital systems, a new capability for PNT. Alongside the tech lift, analysts audited every contract, enforced payer-rate compliance so **under-payments can flag themselves in real time preventing revenue loss rather than chasing it.**

Long-term value: Insight-powered growth

Elevated reporting now delivers clarity down to each service line, giving the PNT team quick actionable insight. Dashboards flag variances in real time, so staff can confirm every payment meets contract terms and challenge under-payments on the spot. **Up to 50% faster billing turnaround** has eased day-to-day pressure and positioned PNT to pursue new growth opportunities. Coronis Health continues to track modifier and coding updates, explaining each change so the team remains fluent and payers stay accountable—keeping revenue accurate as rules evolve.
